

# Evolution, Ecology and Population Biology Seminar – Fall 2014, *Thur. 4pm, Rebstock 322*

<i>Date</i>	<i>Speaker</i>	<i>Title</i>	<i>Affiliation</i>
September 11	Marko Spasojevic	Multi-scale diversity patterns reveal the importance of local and regional assembly mechanisms	WUSTL
September 18	Lori Eggert	Population structure of American black bears ( <i>Ursus americanus</i> ) in the Central Interior Highlands, USA, 50 years after translocation	U. Missouri
September 25	Alejandro Velez	The match between vocal signals and auditory processing in songbirds: It's complicated.	WUSTL
October 2	Tammy Haselkorn	Infectious adaptation: the potential of bacterial symbiont-driven evolution	WUSTL
October 9	Emma Moran	TBD	WUSTL
October 16	Jason Knouft	Sensitivity of freshwater ecological and environmental systems to climatic variability	SLU
October 23	Fredrik Inglis	Rock-paper-scissors games maintain cooperation and diversity in bacteria	WUSTL
October 30	Joan Strassmann	Social evolution and mutualism in the altruistic amoeba <i>Dictyostelium discoideum</i>	WUSTL
November 6	Bob Ricklefs	Intrinsic dynamics of the regional community	UMSL
November 13	No seminar		
November 20	Nate Muchhala	Bats, birds, and bellflowers: The evolution of specialized pollination systems in the Neotropics	UMSL
November 27	No seminar - Thanksgiving		
December 4	Rick Essner	Days with Frog and Toad: An Integrative Analysis of Anuran Locomotion.	SIUE
December 11	Paul Fine*	TBD	UC-Berkeley

\*Student-invited special guest
