

Evolution, Ecology and Population Biology Seminar - Spring 2014, Thurs. 4pm. Reb. 322

Date	Speaker	Title of Talk	Institution
January 30, 2014	Patty Parker	Galapagos Birds and their Parasites: Are there opportunities for intervention?	UMSL
February 6, 2014	Matthew Albrecht	Reintroduction of endangered plants in a rapidly changing world	MOBOT
February 13, 2014	Liza Comita	Who are the species in your neighborhood? Density dependent interactions in a tropical tree community	OSU
February 20, 2014	Tracy Douglas	Selection on multiple mating types in Dictyostelium: more than two but fewer than many	WUSTL
February 27, 2014	No Seminar		
March 6, 2014	Gautam Dantas	Networks of exchanging antibiotic resistance in human-associated and environmental bacteria	WUSTL
March 13, 2014	No Seminar	Spring Break	
March 20, 2014	Gavin Conant	Comparative genomics as a time machine: How relative gene dosage and metabolic requirements shaped the time-dependant resolution of yeast polyploidy	MIZZOU
March 27, 2014	No Seminar		
April 3, 2014	Zuleyma Tang-Martinez	Re-thinking Leks and Challenging Paradigms of Male-Female Sexual Behavior	UMSL
April 10, 2014	Devin Dobias	Quantitative genetics of baboon maternal-offspring interactions	WUSTL
April 17, 2014	Roy Gereau	Phytogeography, climate change and plant conservation in East Africa	MOBOT
April 24, 2014	Pam and Doug Soltis	Genome doubling and angiosperm diversification	FSU
May 1, 2014	Jennifer Gruhn	Phylogeography and species distribution modeling of a North American subalpine tree, whitebark pine (<i>Pinus albicaulis</i> Engelm)	WUSTL
