

Evolution, Ecology and Population Biology Seminar

Spring 2017, Thur. 4pm, Rebstock 322

<i>Date</i>	<i>Speaker</i>	<i>Title/Topic</i>	<i>Affiliation</i>
January 26	Michele Johnson	Physiological mechanisms underlying behavioral convergence in Caribbean lizards	Trinity University
February 2	Joyce Maschinski	Influences of changing points of view on endangered plant conservation	Fairchild Tropical Botanical Garden
February 9	Amanda Koltz	The changing structure and function of arthropod food webs in a warming arctic	WUSTL Dept. of Biology
February 16	Craig Lowe	Gene Regulatory Changes in Vertebrate Evolution and Human Disease	Stanford University
February 23	Kim Sukhum	Evolution of brain regions in weakly electric African fish	WUSTL EEPB
March 2	Xinyi Liu	Journey to the East: wheat and barley took different pathways, faced different ecological challenges, on the way to prehistoric China?	WUSTL Dept. of Anthropology
March 9	Anthony Yannarell	TBA	University of Illinois, Urbana-Champaign
March 16	No Seminar	Spring Break	
March 23	Steve Frank	Three conjectures on organismal design	University of California, Irvine
March 30	Tyler Larsen / David Goad	Experimental Evolution of a Love/Hate Relationship / TBA	WUSTL EEPB
April 6	Kyra Krakos	Plants, power, and politics of the last Medici princess	Maryville University
April 13	Adam Smith	Intraspecific variation in species' responses to climate change: Phenotype, phylogeny, and place	Missouri Botanical Garden
April 20	Holly Bernardo / Dilys Vela	Applied Rare Plant Conservation: A case study of <i>Eurybia furcata</i> / Role of niche assembly mechanisms in explaining global patterns of species diversity	WUSTL EEPB
April 27	Ivan Jimenez	Morphological evidence in species delimitation	Missouri Botanical Garden
