

# Evolution, Ecology, & Population Biology (EPPB)

Spring 2006 Student Seminar Series. Tues 4pm. Reb. 322

Date	Speaker	Institution	Seminar title
17-Jan	Dr. John Landosky	UMSL	The consequences of late season leaf freeze and herbivory on white oak <i>Quercus alba</i> and chickapin oak <i>Quercus muehlenbergii</i>
24-Jan	Brad Oberle	WUSTL	Monopolizing energy promotes richness for bushes: using growth form to explore
31-Jan	Dr. Kevin Smith	WUSTL	
7-Feb	Dr. Mathew Hahn	Indiana Univ	An accelerated rate of gene loss and gain in primates
14-Feb	Dr. Diana Outlaw	Mississippi State	Molecular systematics, historical biogeography, and morphological evolution in <i>Ficedula</i> flycatchers
21-Feb	Dr. Jason Kamilar	Midwestern Univ	Geographic variation in primate ecology: climatic and evolutionary effects
28-Feb	Dr. Jane Phillips-Conroy	WUSTL	
7-Mar	Dr. Catherine Graham	SUNY- Stony Brook	
21-Mar	Dr. John Chick	Illinois Natural History Survey	
28-Mar	Dr. Todd Steury	WUSTL	Correlates with lifetime reproductive success in the reintroduced red wolf population
4-Apr	Nicholas Griffin	WUSTL	
11-Apr	Dr. Briana Gross	WUSTL	
18-Apr	Thomas Sanger	WUSTL	The macro- and microevolution of tetrapod long bone development
25-Apr	Dr. Adam Davis	USDA	Using matrix population models to inform biocontrol agent selection for garlic mustard ( <i>Alliaria petiolata</i> ).
2-May	Marck Menke	WUSTL
